Art Unit: 1623

Upon further consideration, the final action of December 9, 2003 is hereby withdrawn in order to introduce a new ground of rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 2-10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-14 of copending Application No. 10/206,652 in view of Agouridas et al (U.S. Patent No. 5,747,467). The only difference between the compounds of the copending application and the compounds of the present application is at the 2-position i.e. the compounds of the copending application do not have halogen at the 2-position. However, since Agouridas et al disclose that closely analogous compounds having halogen at the 2-position were well known in the art at the time the instant invention was made, a person having ordinary skill in the art at the time the instant invention was made would have been motivated to modify the compounds of the copending application in accordance with the teaching by Agouridas et al.

This is a provisional obviousness-type double patenting rejection.

Art Unit: 1623

Applicant's arguments filed February 17, 2004 have been considered but have not been found persuasive insofar as the above rejection relates to the claims.
